

Dear ,

Your subscription to *21st Century Alert* has just expired. This couldn't have happened at a worse time. The spectacular rebound in the stock market that has followed the September 17th low is running out of steam and we're within days of seeing a major correction -- perhaps even a retest of this year's lows.

The great threat to the stock market remains --- the economy.

The U.S. and the world economies are now officially in a recession -- in fact according to the National Bureau of Economic Research, which tracks business cycles made official saying the day before yesterday the current recession began in March, months before the terrorist attacks on Sept. 11 or the sharp rise in unemployment that began in late summer.

You'll remember that we told you we were in a recession back in March, in fact the headline of our March issue read "RECESSION!"

Anyone betting on a speedy recovery is kidding himself or herself. Recovering from this economic mess that we're in right now -- is going to be more challenging than most of the "experts" are saying it will be and its not going to happen over night.

To make money in the stock market during the next few months you'll need to focus on doing it in a market that has a bearish bias. To help you we've added new features to our *21st Century Alert* service that makes renewing your subscription imperative.
