

**Starting today - you can capture massive gains on ordinary stocks -
all while spitting in the face of Wall Street's most arrogant...
greedy... and corrupt!**

DON'T GET MAD - GET RICH

**The Man Who Called the Sub-Prime Collapse Back in February
2007 Didn't Stop There - He's Been Helping Investors Just Like
You Get Revenge on Wall Street's Biggest Crooks - to the Tune of
927% Gains in Just Two Months
Here's the Best Part - *the Biggest Gains are Still Ahead of Us...***

Dear Investor,

The best revenge is success. It's the ultimate in getting even.

Because instead of getting a tiny morsel of satisfaction from bankruptcies, buyouts and prison sentences...

We're getting rich instead.

Truth be told... Only a handful of sacrificial lambs will ever be forced to suffer for the \$5 trillion worth of damage inflicted on U.S. investors.

So the only way for you to *really* get even is to make a fortune... and that's just what we've been doing. And now I'd like you to join us as we take money right back from Wall Street's most nefarious villains.

Here's what I mean...

Over the last six months, time after time - as Wall Street's biggest crooks lied to investors - one small group of investors (led by research analyst Ian Cooper) has been raking in double- and triple-digit profits.

It's all happening through Ian Cooper's "**Wall Street Revenge Strategy**" - a simple yet powerful technique that's worked to the tune of 927% profits - in just six trades - over two months' time.

And we're just getting warmed up.

Because in the weeks ahead, Ian anticipates no fewer than seven 'Wall Street Revenge Strategy' trades coming into play - with explosive profit potential even greater than the triple-digit gains they've already realized. Gains like...

203% as Retribution against Boldfaced Lies

For example, when Countrywide CEO Anthony Mozilo was lying through his teeth about more than \$50 billion worth of "cushion"... steering his company toward financial disgrace and an inevitable takeover - he was also crossing the T's and dotting the I's on a golden parachute worth more than \$110 million.

It was absolutely disgraceful.

Angry investors - and out-of-work employees - were furious... and government investigators started asking questions.

What did Ian and his small group of investors do?

They collected a 203% profit in just a matter of days on Countrywide... all by using the powerful Wall Street Revenge Strategy.

14 Triple-digit Winners to Spit in the Face of Government Ignorance

U.S. Treasury Secretary Henry Paulson - with all due respect - has to be one of the most ignorant men in the history of government.

See for yourself...

- In April 2007, Paulson said that sub-prime mortgage troubles would "be largely contained"...
- In May 2007, Paulson said the housing correction was "near the bottom"...
- And in October 2007 Paulson said, "I can't think of any situation where the backdrop of the global economy was as healthy as it is today."

It's actually quite remarkable just how wrong this man was time and time again.

But while Paulson was spouting off about housing reaching a bottom - or how the government wouldn't bail out Fannie and Freddie - Ian and his followers were busy taking triple-digit profits to the bank...

...Gains like 291% in 16 days... 141% in 4 days... 136% in 13 days... and 111% in just two days.

But those are just a few of the 14 triple-digit winners they've pocketed during Paulson's *Reign of Ignorance*.

Short-term Profits of 135%, 205%, 188% and 95% as One of Wall Street's Titans Crumbled

At one point in time, Lehman Brothers was the #4 U.S. investment bank - and a Wall Street titan with an impeccable reputation.

And even though Lehman had weathered every financial storm of the past 150-plus years, we knew they were scrambling as far back as early 2008.

So while CEO Dick Fuld and CFO Erin Callan were conducting a multi-billion-dollar smoke-and-mirrors campaign, Ian Cooper's "**Wall Street Revenge Strategy**" was springing into action. And now that Fuld, Callan and other Lehman executives are facing the heat from the Feds, Ian and his group are counting the money made in just a period of days... when they walked away with gains of 95%, 49%, 188%, 208% and 135%.

Here's part of a message *Options Trading Pit* subscribers received on September 15:

"Four trading days ago, LEH traded above \$13 a share. Then it broke under its descending triangle, and fell under 25 cents four days later. And you were on board with puts every step of the way. Congratulations. Reportedly, LEH is filing for bankruptcy. They're done. Kaput. Over. We're taking our triple-digit gains, and laughing at LEH longs."

If you're like me - and you've had enough of the lies, corruption and unabashed greed from Wall Street's "finest" - then you'll want to get in on this action right away.

If the lies and deceit coming from Wall Street have impacted your retirement even a little bit...

Then it's time to exact your revenge.

The truth is - taking advantage of Wall Street's nosedive is easier than you think, thanks to Ian Cooper and his deadly accurate "**Wall Street Revenge Strategy**."

Read on to find out how you can...

Start Getting Rich - Today - at the Expense of Wall Street's Greediest Banks

Let's be honest about what has gone on over the past 18 months...

Wall Street has failed us.

Unspeakable fortunes have been made at the expense of shareholders... retirees... and the U.S. economy as a whole.

And most never saw it coming.

But let me introduce you to the one man who DID see it coming.

His name is Ian Cooper. And he's the research "genius" who perfected a strategy that

"Here's how I did with your last two trades: AXPMQ, bought 11/12 for \$2.50, sold 11/13 for \$4.20 for a 68% one day gain. XJZMM, bought 11/11 for \$1.56, sold 11/13 for \$2.43 for a 56% gain in two days... Take care, Ryan..."

allows everyday investors to get even - and get rich - all at the same time.

Now I realize that every analyst in the world these days is trying to claim that he "called" the market collapse months in advance.

But let me ask you something...

How many of them are offering up any *proof*?

Way back in February 2007, Ian Cooper wasn't just offering up general advice about stocks being too expensive. He was issuing specific warnings - and making his readers thousands of dollars.

Here's what he had to say about the collapse all the way back in February 2007...

"We're still not nearing a housing bottom, or an improving lending market... we were so bearish on the (lending market) sector that we recommended our readers load up on New Century Financial put options two days before the stock fell \$14+... readers cashed out with 89% gains... the worst is not over for sub-prime lenders."

But for Ian, simply warning his readers of the coming danger wasn't enough...

Instead, while the Wall Street crowd has been killing your portfolio, Ian Cooper - using his Wall Street Revenge Strategy - was using Wall Street's greediest companies to make an absolute killing.

In fact, since May 28, 2008 he's led his own tight-knit group of investors to gains of 2,083% - and he's done it in a market that has been absolutely turned upside down.

I'm talking about gains like...

- 108% gains in 21 days as Countrywide plummeted
- 183.33% gains as Expedia's shares tanked 19%
- 291% gains in 16 days as Fremont General's share price lost 9%
- 305% gains in just two months' time as shares of CREE, Inc. jumped 57%
- 140% gains in just 23 days on a rise in United States Natural Gas shares
- 156% gains in just 11 days as an emerging markets ETF plummeted

Now you must understand two things: 1. Ian's average overall gain is an astonishing 70%. 2. He's only getting started.

"Ian, I read you play on MS last night and got in at 9:40 am today at 7.59 puts Jan 25, I sold just after noon for \$11.08...yahoo. You just keep doing what you do best and send out the picks. Never made so much money in a down market

I'm writing you today to let you know how you can join Ian Cooper and the readers of his remarkable trading service - which has amassed gains of 2,083% since May 28 - starting immediately.

Because I have to tell you - there's nothing like the

Thanks. - Dave

satisfaction of closing out a triple-digit winner while the share price of companies run by the likes of Countrywide's Anthony Mozilo... Bear Stearns' James Cayne... or Lehman Brothers' Dick Fuld are dropping like a lead balloon.

And over the past few weeks, Ian Cooper has been on fire - racking up triple-digit gains in just a matter of days with trade after trade... and all of them have come at the expense of the very same men and women who have already put a dent in your retirement account.

Here's what I mean...

6 Simple Trades... 927% Profits - in Just 2 Months!

#1 - On September 9, 2008 Ian Cooper saw the danger that still existed for Lehman Brothers and recommended buying put options on LEH. Just one day later, Ian cashed out half of his position with a **95.3% profit**... and four days after that he cashed out the rest **for gains of 207.8%**!

#2 - That same day, Ian recommended even more put options on LEH. A day later, Ian cashed out half of this position with a 48.85% gain... and four days after that he cashed out the rest for gains of 134.5%! That means **an initial investment of \$10,000 - spread out evenly among Ian's two LEH put option recommendations - would have turned into \$22,161 in just 7 days... a total gain of 121.6%**!

#3 - On September 16, Ian told subscribers: "Morgan Stanley could easily be one of the next to fall" - and he recommended buying put options on MS. The very next day, Ian told readers to cash out half of their position for **70.97% gains**... and one day later he cashed out the remainder for **an additional 12.9%**. **That's a 41.9% gain in just two days as Morgan Stanley got crushed!**

#4 - On September 17, Ian correctly forecast a bailout of global insurance firm AIG and recommended call options on AIG. Just 15 days later, Ian recommended his subscribers exit half of the position and pocket their **125% gains**... and four days after that, Ian cashed out the remainder for **another 100%**.

#5 - On November 11, Ian wrote to **Options Trading Pit** subscribers that "more (banks) will fall and fall hard" and recommended buying put options on the Financial Select Sector ETF (XLF). Just two days later, Ian wrote his subscribers again and instructed them to pocket their **two-day profits of 62.16%**.

#6 - On November 12, Ian recommended put options on American Express (AXP). The very next day, Ian advised readers to exit half their position... and putting their **one-day gains of 70% in their pocket!**

That adds up to cumulative gains of 927.48% - in just 66 days. And it happened during a stretch when the Dow Jones Industrial Average plummeted a whopping 31.8% - down from 11,600 all the way under 8,000 at one point!

Every last cent of those 927.48% gains came from Ian's "revenge" trades - recommendations designed to give you maximum profit opportunity... even while some of the foundations of Wall Street are crumbling around us.

"Got in at 0.90 and currently up 111%... not bad for a 2 day stretch."
- JL

That's why I love trading options...

And that's the beauty of Ian Cooper's ***Options Trading Pit***. Ian helps his readers play both sides of the market... and make an absolute mint in the process.

How Legendary Trader Ian Cooper Perfected the Art of Short-Term Trading

Ian Cooper has spent the better part of the past decade mastering the art of trading options for triple-digit gains.

Over that time, he's shown thousands of investors exactly how to exploit carefully targeted market sectors for lightning-fast short-term gains... gains that prove to be several times larger than simply buying stocks alone.

It's his phenomenal track record of triple-digit, short-term winners that put Ian in such high demand from mainstream outlets such as *Investor's Business Daily* and *Forbes*... and on investment shows such as *Money Matters with Barry Armstrong* and *On the Money with Mike Stein*.

"Tremendous call by you on the subprime blow-up. Kudos..." - RM

Truth is, they want to pick his brain as much as anyone, because no matter what happens to the general market - or a stock's share price - people who follow Ian Cooper's advice make an immediate killing almost every time he

alerts them!

And while millions of Americans have been in an absolute panic over our current financial crisis... Ian and his readers have been consistently raking in some amazing gains.

That's because the volatility we've seen in the markets over the past 12 months is actually perfect for options traders like Ian. It "***turbocharges***" the profit opportunities and delivers winners much faster than in the "old days" of two years ago or more.

The beauty of it all is that Ian's readers are just everyday Americans who have become fed up with the lies and incompetence of Wall Street... and have decided to take their investment future into their own hands.

"Bought 3 contracts on the LEND puts at 3.80, and exited at 15.70 - a 313% gainer. Not bad for an 18-day holding period." - GS

- People like Neil M., who recently used Ian Cooper's **Wall Street Revenge Strategy** to collect **\$4,195 after a single trading day...**
- Or Bruce H., who collected **an extra \$5,000 inside 13 days** by following Ian's advice...
- Or Brian A., who, after months of following Ian's recommendations, **turned an initial \$10,000 into an astonishing \$450,000!**

Red-Hot Options Trades with a Minimum Target of 100% Gains

So what is Ian Cooper's "secret" to making a killing for his readers with carefully selected options trades?

The truth is... there is no secret - just some good, old-fashioned, roll-up-the-sleeves research and analysis.

And fortunately for you - Ian handles all of the heavy lifting.

He sifts through general market analysis. He looks at the bigger picture. He finds what sectors will benefit from any situation. Then he scrutinizes hundreds of potential opportunities for his readers to invest in.

Once the initial analysis is complete, Ian then incorporates **four specific indicators**, including Bollinger Bands, W%R, candlesticks, and breaking news. Using just these four, Ian can call for tops and bottoms on indices, as well as individual stocks.

But that's just the beginning.

He then applies each one before ever making a decision. Every one of them has to align on a stock in order for it to be considered for recommendation.

And even if all of Ian's indicators line up properly, he still won't recommend a single play unless he firmly believes it has the ability to return in excess of at least 100% gains - and in short order.

Obviously I've simplified things quite a bit here. But let's be honest - it wouldn't be fair for me to give away Ian's **entire** methodology in letter.

The simple truth is this: After sorting through hundreds of opportunities each week, Ian identifies the "best of the

Average Gains of 70% in the Midst of The Great Financial Crisis of 2008

One day, historians will refer to it as The Great Financial Crisis of 2008.

But Ian Cooper and his **Options Trading Pit** readers are still cashing in on this crisis... making a mint... playing both long and short sides of the market.

It's the only way to profit in these chaotic times.

And it's already paid off in a big, big way. In fact, over the past couple months, readers have closed 25 wins out of 30 trades... enjoying average gains of 70%, even as the major indices whipsawed hundreds of points... including:

- Lehman Brothers
January 2009 10 put:
95% in a day
- Lehman Brothers
January 2009 10 put:
49% in a day
- CurrencyShares British
Pound 177 put: 26% in six
days
- Lehman Brothers
January 2009 10 put:
208% and 135% in four
days
- Morgan Stanley January
2009 25 put: 71% and
10% in two days
- AIG January 2009 5 call:
125% and 100% in 12

best" using his time-tested methods of analysis. Then... Ian goes one step further, insisting on providing his readers with only those opportunities that have the potential for explosive growth.

Imagine - instead of only pulling in marginal gains on stocks that do well, say an 18% gain in 23 days, you could be sitting on 140% gains on the same stock during the same period!

All thanks to the "magic" of options trading.

And with the addition of Ian's "Wall Street Revenge Strategy" - the gains when a company goes down can be even larger - sometimes twice as large. In the months ahead - as more and more of Wall Street's greediest, most reckless firms see their shares plummeting... Ian and his readers will be right there to cash in on triple-digit gains the entire way.

"You have made me a ton of money over the last 5 years than any one else has. Following your every word, including stop losses, **you've helped me turn \$10,000.00 into more than \$450,000.**" - B.A.

That's why so many investors are right now craving Ian's advice. They know that, at this very moment, his options trades are the easiest - if not the only - way an investor can fight through these difficult times and come out on top.

In fact, just since May 28th, when he launched his Options Trading Pit service, Ian's portfolio has returned gains in excess of 2,083%.

I know. Options investing still may seem a little complicated... but it's actually much easier than you might think.

And to make certain you know exactly how everything works, Ian has prepared the following four bonus reports... so you can follow along with everything he might alert you to.

- **Bonus Report # 1: Understanding Options for Maximum Gains**, featuring easy-to-understand explanations of Ian's options strategies and terminology.
- **Bonus Report # 2: How To Secure Long-term Profits with LEAPS**
- **Bonus Report # 3: The Bear Market Baron's Guide to Options**
- **Bonus Report # 4: How To Lock in Huge Gains by Going "Greek"**

These special reports are yours absolutely free - the moment you decide to join Ian and his wildly successful group of investors as they make fortune after fortune in his hottest service, **Options Trading Pit**.

If you're sick of getting screwed over by the likes of Treasury Secretary Henry Paulson, Lehman's Dick Fuld and AIG's Martin Sullivan - then it's time you started profiting from

- days
- iShares Emerging Markets 32 put: 71% and 157% in six days

Rest assured, **Options Trading Pit** will always play both sides of the market. It's the only way to win big.

Whether it's another big corporation about to go down, or a on the verge of a breakout, Ian Cooper will find them. And you'll profit.

Simply follow Ian's lead and he'll show you exactly what to do, when to do it, and how to come out on top.

their incompetence instead of suffering from it.

I've already spelled out for you in this letter a few of Ian's most recent "Revenge" trades.

But this crisis is far from over - with more banks on the verge of failure and more costly bailouts on the horizon.

That's why *right now* is the perfect time to jump on board - as the months ahead figure to produce dozens more short-term "revenge" profit opportunities similar to the ones I described earlier.

"Great call on the TMA October 20 puts. Bought on 8/8 @ 3.10, sold them on 8/13 @ 7.50... I may have exited a little early but am very happy with a 142% return in less than a week." - CP

But you'll only be able to cash in if you join us today...

Introducing: Options Trading Pit - Make A Killing On Stocks... Before Wall Street Kills You!

Now, before I get too far ahead of myself, let me emphasize one more time... We're after the fast money.

And with Ian following and executing his **Wall Street Revenge Options Trades** with increasing frequency as more institutions keep sinking lower and lower... the fast money is rapidly turning into the easy money.

"In [TMA] at 3.70... out at 7.50. Right on! Another 100%er." - DB

That's why we launched this exciting service in the first place.

By not having a pure options service, especially in this crazy market - where we can get in and out quickly with 50% to 207% profits in just a few days - we'd be missing out on some easy money.

In some cases, over 300% rapid gains on stocks alone!

It's time to turn the tables on Wall Street.

After watching your own retirement account take a hit as a result of the lies, greed and deceit of Wall Street's "hot shots" - it's time for you to start cashing in on the chaos they've caused.

But like I mentioned a moment ago - as a result of this incredible market we're in right now - Ian is issuing alerts rapidly... and as you've seen, sometimes they're only open for a day or two.

So it's imperative that you're able to act fast to get the quickest gains.

In and out. Take the profit and run. That's precisely the game plan that's made this service an incredible success.

"Another excellent calls. Can't wait for next week to see what the plans are. Options are the way to make a fortune if you have good advice." -

Of course, if the number of trades bothers you, then this

service simply isn't for you.

JL

But if getting rich doesn't bother you, I urge you to join right now.

Lightning-Fast Profit Alerts

One more thing: your trading alerts will be sent to you via e-mail directly from Ian Cooper.

Options Trading Pit is not a fax service - instead, Ian uses email because we want everybody to receive the trade at approximately the same time.

And just so that you don't have to recheck your email 10 times a day, we're also offering **Options Trading Pit** updates VIA live RSS feeds - so you can get the alerts the split second they're available!

If you're comfortable with what I've shared so far, then I urge you to join us today.

"I started with \$14,200. I paid for the service and 13 days later I earned the subscription fee back... and using your strategies I'm at \$19,200..." - B.H.

Again, I know this style of trading isn't for everybody. But by signing up for the **Options Trading Pit**, you're elevating yourself into the top tier of the trading community - light years beyond what most unfortunate American investors can handle.

So if you're interested, welcome aboard.

Listen Carefully - Here's How to Get Started

When you fill out the membership form, you'll immediately receive a confirmation and a welcome letter, as well as a link to the **Options Trading Pit** site, where you'll be able to access every single one of the positions Ian issues... 24 hours a day. We'll also rush you Ian's four new special reports, listed above. And be assured, this is a service that details every last step and every single instruction... as we go after the profits one by one.

And that's not all!

"Sold half at \$9.20 for a 114% gain in 1 day on CFC." - NM

By signing on today, I'll also rush you a free copy of my new best-selling book, **Profit From the Peak**.

In short, **Profit from the Peak** is a roadmap that shows you how to profit from the rise of oil prices.

In the book, my colleague, Chris Nelder, and I go into full detail on tackling the world's energy problems... and how investors can maintain financial security in the process. I can say with confidence that Chris and I know a little more about today's energy markets than your average 'oil expert.'

You see, Chris is a well-regarded energy expert who has designed and built dozens of

solar energy projects. This is a guy who understands the energy market inside and out... from energy's worst problems to its brightest solutions. And for the last decade, Chris and I have preached that investing is key to solving the world's energy challenges... Investments in a multitude of energy practices and technologies that will wean us away from our dependence on oil.

But we're also quick to point out that this blueprint for success also includes the economic harvesting of remaining and unconventional oil sources.

So to recap - once you sign up, you'll get immediate access to the **Options Trading Pit** web site... Ian's 4 new research reports... and a copy of the best-selling book, **Profit from the Peak**.

"Not too bad for a week's trade.
TMAVD: 270%, CFCVY: 226%..." -
JL

And, of course, you'll be placed on the email distribution list so you can begin receiving Ian's trade alerts - which can arrive any time of the day, from 9 a.m. to 8 p.m.

Now at this point, I'm sure you're wondering - with the explosive, triple-digit profit potential of every trade recommendation... access to Ian's complete trading history with **Options Trading Pit**... plus his latest reports and a copy of **Profit from the Peak**...

How Could You Possibly Afford a Subscription to Ian Cooper's **Options Trading Pit**?

I'm not going to sugarcoat it.

This level of service is highly specialized. And the countless hours it takes Ian to find, study, and recommend just one of the calls or puts he uncovers - as you can imagine - takes a lot of time, expertise, and resources.

He doesn't draw stocks from a hat. He's not paid by other companies to recommend one over the other.

His secret is that he's an insomniac, sleeping just three hours a night.

The rest of the time, when other traders and researchers rest, spend time with their family, and take vacations, he's intently focusing on the latest news, studying the markets, and developing high-ranking contacts.

That is, however, precisely what it takes in order to hold a track record as clean as Ian's... a portfolio that scores investors like you the greatest option trades the market

How to Put Ian Cooper's Wall Street Retribution Strategy to Work For You

Not only has this strategy lead to an unheard-of 2,083% in profits since May 28...

It's also incredibly easy to use.

- You don't need to start with a lot of money - in fact, as little as \$1,000 will do just fine...
- You don't need to have all your savings tied up in multiple investments for years...
- You don't even need to find dozens of trades each year in order to realize significant gains.

Instead, all you needed with Ian's Wall Street Retribution

has to offer.

After all, I can't think of a single other trader on the planet who's collected cumulative gains of 2,083% since May!

Strategy over the last two months was six simple trades and you'd have been able to pocket 927% profits.

And with just one of Ian's most recent "Wall Street Revenge Trades" you could have turned \$10,000 into \$22,161 in just 7 days. ***Again...that's just with 1 trade!***

"I held on to your SPF trade for a 500%+ gain. Nice!" - EO

That being said, I've seen other "experts" billing themselves out for several thousand dollars a day - and their trading advice can't tread water next to the winners Ian shows you on a weekly basis.

So I wouldn't feel the least bit guilty charging as high as \$5,000 a year for a membership to his advisory.

But I'm not going to go anywhere near that.

In fact, the normal membership price is only \$999 a year - only I'm going to make you an even better deal than that.

Our Lowest Price Ever - and I'll Assume ALL of the Risk For Your Subscription Cost

If you enroll in the ***Options Trading Pit*** today, you can save a full 20%, and join for just \$799 this year!

I know for many of you \$799 is a big lump of money to take down, even considering that many of you have made hundreds of thousands of dollars following our advice.

"I kept my stops in place and was closed out at 4.90. I had bought them for 1.75. 100 contracts... a respectable 30 plus thousand gain."
- DF

So here's the deal. We're also offering a quarterly bill program. If you choose that method, you'll be charged just \$250 every three months.

It's as easy as we can make it to get you on board.

In addition, we want to make sure you're 100% satisfied. So, if for any reason you're unhappy with ***Options Trading Pit***, you can get a full refund at any time before the end of the first month of your membership.

After that, the refund is prorated.

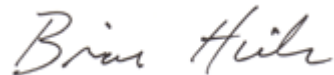

But I know you'll be more than satisfied with the returns you'll be able to collect from Ian's deadly-accurate, short-term trading recommendations.

By taking this one simple step - and signing up for a risk-free subscription to ***Options Trading Pit*** - you'll be turning the tables on Wall Street and getting back the retirement dollars they've stolen from you... and then some.

With just a few easy-to-follow recommendations, Ian Cooper will personally show you how to take advantage of Wall Street's greed and stupidity - and how to start profiting to the tune of double- and triple-digit gains as Wall Street's most incompetent take a hard fall.

Subscribe Now!

Sincerely,

Brian Hicks
President, Angel Publishing

P.S. Remember - in just two months' time, Ian helped his readers to gains of 927% from just 6 simple trades. And in the weeks ahead, Ian anticipates even more "Wall Street Revenge Trades" providing even greater opportunity to profit. Again... your first 30 days are 100% RISK-FREE, so you have nothing to lose by signing up today!

<http://www.angelnexus.com/o/op/9951>
