## CHAPTER ONE

### Fact vs. Fraud — The Overprescribed Prostate Health Fraud!

There is fact...and then there is fraud.

- **FACT:** Half of all men over the age of 50 — about 22.7 million in the United States and Canada combined — have an enlarged prostate.
- **FRAUD:** In spite of what the pharmaceutical companies would have you believe... not everyone experiences troubling symptoms.
- **FACT:** In 2007, a total of \$69.7 million was spent on marketing for Avodart® — and in 2008, the manufacturers of Flomax® spent a whopping \$115 million on advertising.
- **FRAUD:** According to Dr. John Santa, director of the **Consumer Reports Health Ratings Center**, “We’ve seen advertising for this drug skyrocket, and as a result, Flomax® is now overprescribed.”

***You read that correctly — he said overprescribed.***

Yet this story has absolutely no legs in the mainstream media.

Well...that shouldn't be too surprising. After all, with mammoth drug companies each

spending hundreds of millions of dollars on advertising via the mainstream media, reporters and “investigators” tend to look the other way.

It's quite possibly one of the biggest frauds in medical history.

Listen...almost every man — if you live to the age of 70 or older — will eventually develop an enlarged prostate.

But that doesn't mean you should resign yourself to a crippling sentence of expensive prescription drugs...or disfiguring surgery!

Did you know — as an aside — that a Flomax® prescription costs as much as \$246 per month? That's nearly \$3,000 per year.

**And there were 11 million prescriptions written for Flomax in 2008.**

I'll do the math for you — at \$3,000 per

*continued, please turn...*

year, that's \$33 billion in new prescriptions written in just one year!

No wonder this drug's "dealers" want to get you hooked...once your doctor signs his name, you become a very lucrative new customer!

**The most important thing you can do — starting right now — to avoid becoming a victim of this fraud is take a few simple, proactive steps toward managing your prostate health.**

The big drug companies don't want you to know this, but...

***It is possible — using an all-natural solution — to enjoy optimum prostate health.***

By incorporating one all-natural formulation I'm about to show you into your daily health regimen, you can achieve all of these goals — and more — without a \$3,000-a-year

more beta-sitosterol. More reasonably priced than Prosta-Max. Easier to swallow than Prosta-Max. No sharp lines on the side of the pill.”

prescription...

➤ **Eliminate** those frustrating late-night races to the bathroom...

➤ Stop dribbling...and **start peeing with the same force you had 20 years ago...**

➤ **Regain your energy** — and the sex drive you used to have: your wife will wonder where you've found so much energy

➤ And best of all... you'll **avoid painful — and potentially dangerous — surgery.**

Let me show you what I mean...

## CHAPTER TWO

### The All-Natural Prostate Health Discovery that Could Change Your Life

#### Dozens of clinical trials confirm the power of this discovery

**F**or years, men have had only one choice when seeking an all-natural prostate solution — Saw Palmetto.

And according to the American Academy of Family Physicians, **“Saw Palmetto is an effective treatment for the symptoms of BPH.”**

BPH, of course, is short for Benign Prostatic Hypertrophy — the “technical” name for an enlarged prostate.

The American Academy of Family Physicians also said that saw palmetto is **“better tolerated”** and **“less expensive”** than popular prostate medications commonly prescribed by physicians.

Now that sounds great — and there’s no question that saw palmetto can be an important part of maintaining optimum prostate health.

But here’s the thing...

***The discovery I’m writing you about today was found to be 3,000 times stronger than Saw Palmetto!***

This amazing discovery is **Beta-sitosterol** (pronounced

BAY-tah SIGHT-oh-STAIR-all) — and I’ll show you why I’m convinced this is the single most important male health discovery of our generation.

*So what is Beta-sitosterol?*

It’s actually a “plant alcohol” that is found — in trace amounts — in many of the grains and vegetables we eat every day.

But when taken in concentrated form...the results are astounding.

Dozens of clinical trials have confirmed that Beta-sitosterol — which has been used by men in Europe for years — is both safe... and highly effective.

Take a look...

➤ The *Journal of the American Medical Association* reviewed 31 years of studies — involv-

*continued, please turn...*

ing more than 2,900 men who were treated for BPH with strong extracts of saw palmetto containing Beta-sitosterol. The conclusion? “The evidence suggests that *Sere-noa repens* (saw palmetto) **improves urologic symptoms and flow measures.**”

- Doctors at the Veterans Administration in Minneapolis compared Beta-sitosterol to other natural supplements used for prostate health and concluded that ***Beta-sitosterol shows “the greatest efficacy”*** of the substances they tested.
- A British study — covering six months and more than 200 men — concluded that “Significant improvement in symptoms and urinary flow parameters ***show the effectiveness of beta-sitosterol*** in the treatment of BPH.”
- A U.S.-based study — spanning some 519 men — suffering from BPH confirmed, ***“Beta-sitosterol improves urological symptoms.”***
- A six-week study on the effects of Beta-sitosterol conducted at the University of Brussels, Belgium concluded that “the quality of life score, urinary flow rates, residual urinary volume, and prostate size were found to be significantly

improved after only 45 days of treatment. ***After 90 days of treatment, a majority of patients (88%) and treating physicians (88%) considered the therapy effective.***”

I’ve only listed a handful of the dozens of clinical studies that testify to Beta-sitosterol’s powerful effect in promoting sustained prostate health.

Simply put...this single discovery — one I call the most significant male health discovery of our generation — gives you an all-natural solution for avoiding the Great Prostate Health Fraud!

So let me tell you how you can put this powerful discovery to work for you as part of a breakthrough new formulation that is now available...

**Introducing...  
Prostate Defender:  
Your “Secret” to  
Maintaining a Healthy  
Prostate Without Expensive  
Prescription Drugs!**

I’ll tell you right up front — the single most prominent ingredient in our new **Prostate Defender** is Beta-sitosterol.

And with good reason.

Simply put... incorporating Beta-sitosterol — with

our new **Prostate Defender** — into your daily health regimen will help you...

- **Get a refreshing night's sleep**, as you'll no longer have to endure multiple late-night bathroom trips...
- Pee with the same force you had 20 years ago — allowing you to **experience true relief**...instead of feeling like you need to go again just a few minutes later!
- **Become a “tiger” in the bedroom again** — yes, you read that correctly — as you'll take advantage of the sexual benefits associated with Beta-sitosterol, **including increased sex drive... renewed energy...and better sexual performance!**
- Perhaps most importantly — you'll avoid painful surgery... and steer clear of **The Great Prostate Health Fraud**. The \$3,000 per year you'll save by avoiding prescription drugs is only the beginning. I'll tell you more in just a bit

about the other “hidden” costs associated with **The Great Prostate Health Fraud**.

But first, I need to tell you...

### **What Makes Prostate Defender Your Best Choice for Maintaining a Healthy Prostate**

You see...it's not just the fact that **Prostate Defender** gives you a potent daily supply of Beta-sitosterol...

It's the combination of ingredients — each specifically selected for their prostate health benefits — that make **Prostate Defender** so powerful...

**Ingredient #1: Beta-sitosterol** — It's the primary ingredient in **Prostate Defender**...the revolutionary plant-derived sterol that was found to have the greatest efficacy of all substances tested in one clinical trial!

**Ingredient #2: Zinc** — studies have shown that zinc may play a role in helping shrink an enlarged prostate...

**Avoid the Great Prostate Health Fraud!**  
**Prostate Defender is the All-Natural Alternative!**  
**Best of All — You Can Try it Risk-Free!**

Try **Prostate Defender** with our “**Best Deal**” right now and you'll receive a **FREE** gift worth \$19.95...**FREE** shipping...and nearly \$360 in yearly savings off the regular price. And your order is backed by our one full year, 100% money-back guarantee! **See page 23 to claim your FREE gift or call...**

**1-866-967-0648 right now.**

**Ingredient #3: Selenium** — essential for healthy prostate function...

**Ingredient #4: Lycopene** — recent studies have shown that lycopene promotes not only prostate health but heart health as well!

**Ingredient #5: Saw Palmetto** — For years, men have incorporated saw palmetto into their daily health regimen to help maintain optimum prostate health...and with good reason. Research has shown it to have a similar positive effect on prostate health as certain prescription medications — but it is “better tolerated” and “less expensive.”

But there's one more

important thing you need to know about this powerful new, all-natural formula...

**Prostate Defender** comes in the form of a softgel capsule.

That means it's much easier for you to swallow... and it's easier for your body to absorb.

But don't just take my word for it when it comes to the effectiveness of this powerful new formula — here what our customers have to say below...

“My doctor mentioned that my prostate seems to be enlarged. After tests that showed no cancer, I began taking **Prostate Defender**. A few weeks later, my wife mentioned that she noticed that I am not getting up in the middle of the night as I used to when I needed to urinate.”

~ T.S., Norco, CA

“My husband's functions returned to normal less than a week of taking **Prostate Defender** twice a day. We highly recommend it!”

~ J. R., Calexico, CA

## Prostate Defender Works for You — Or You Pay Nothing!

**Prostate Defender** includes Beta-sitosterol — the most important male health discovery of our generation. But even better...it's guaranteed to work. Our 100% money-back guarantee means you'll have one full year to return **Prostate Defender** — for any reason — if you're less than satisfied.

## CHAPTER THREE

### ***Shocking Warning From The Mayo Clinic*** ***Why Ignoring Your Symptoms Could be*** ***Extremely Dangerous***

Let's face it.

The immediate problems brought on by an enlarged prostate are... well...they're ***downright embarrassing***.

I'm talking about...

➤ **Frustrating trips to the restroom** — with a weak, “dribbling” stream or a complete inability to urinate...

➤ **Painful urination** — in some cases with blood in your urine...

➤ **Running to the restroom** so frequently that it's impossible for others not to notice...

➤ Even a humiliating **inability to get or maintain an erection**.

So it's no wonder many men choose to ignore their symptoms at first — rather than face a potentially uncomfortable trip to the doctor or pharmacy.

But to ignore your symptoms could be a grave mistake.

No less an authority than the Mayo Clinic has warned that — left untreated — an enlarged prostate, also known as BPH, can become potentially lethal.

Left untreated, BPH can become more than a nuisance — it can cause complications:

***“Untreated prostate gland***

*continued, please turn...*

***enlargement can block the flow of urine out of the bladder and can cause bladder, urinary tract or kidney problems."***

Just how serious are these complications? Take a look...

- **Sudden, sharp pain** — known as Acute Urinary Retention (AUR) — coupled with a complete inability to urinate...
- **Dangerous, painful infections** and irritation caused by bladder stones — including blood in the urine and obstruction of your urine flow...
- **Permanent bladder damage** — caused by the bladder not emptying completely...
- **Chronic kidney disease and permanent kidney damage** — caused by frequent infections.

Now...if left untreated for an

extended period, your enlarged prostate will eventually leave you with just a handful of options you wouldn't wish on your worst enemy.

That's because you could become a candidate for painful surgery — including all the potential complications involved.

***"Of all of the options, surgery is the one most likely to leave you with erectile dysfunction."***

Roughly 1.2 million men each year undergo surgery for their enlarged prostate.

And as you might expect — we're talking about an extremely painful procedure...involving a most sensitive area.

The most common surgical procedure is known as "TURP" (**Transurethral Resection of the Prostate**) — and it involves the surgeon passing instruments through the tip of the penis... up through the urethra...into the bladder — and then "shaving

off” excess tissue from the prostate.  
Ouch.

Of course...you'll need a catheter for several days following the procedure — and you can expect to see blood in your urine.

*(Wait...this is a treatment?)*

Additional side effects you can expect from surgery include...

- **Urinary discomfort**
- **Inability to control urinary flow**
- **Increased risk of infertility**
- **Increased risk of erectile dysfunction**
- **And urinary incontinence**

Now believe it or not...there's another option available for treating your enlarged prostate that may actually be worse than painful surgery.

You could be sentenced to a lifetime of prescription drugs. This is essentially a \$3,000-per-year drain from your bank account as you become yet another victim of **The Great Prostate Health Fraud**.

Let's be honest: No one wants to wait until surgery or prescription drugs are the only option.

That's why it's so important you take a decisive first step toward maintaining a healthy prostate — right now — by making our **Prostate Defender** formulation a part of your daily health regimen!

*continued, please turn...*

## **Say Goodbye to Painful — And Embarrassing — Symptoms!**

Let **Prostate Defender** provide a powerful, all-natural solution to optimum prostate health... and eliminate those nightly “races” to the bathroom — along with the other painful symptoms of an enlarged prostate.

And with **Prostate Defender**...you're avoiding the high cost — and dangerous side effects — or prescription drugs!

***Best of all...Prostate Defender is guaranteed to work.***

## CHAPTER FOUR

### Say Goodbye to Embarrassing Symptoms — and Expensive Treatment!

#### How to Feel More Energized — Both in and Out of the Bedroom

No question about it — the symptoms most commonly associated with an enlarged prostate are not only frustrating...they're also downright embarrassing.

But as you age...**your chances of experiencing these symptoms rise dramatically...**

By the time you reach age 50, you have a better-than-50% chance of experiencing symptoms of an enlarged prostate...

As you approach age 80, that number soars all the way to 90% — meaning you're almost guaranteed to have to face this reality at some point in your lifetime.

And it's often a painful, infuri-

ating reality — one where you're faced with...

- **An exhausting loss of energy**
- **Complete loss of sex drive**
- **Difficulty getting and maintaining an erection**
- **Maddening trips to the restroom — where your “dribbling” or weak stream leaves you more frustrated than ever**
- **Painful — and sometimes bloody — urination**
- **Weeks filled with sleepless nights — thanks to frequent “races” to the bathroom in the middle of the night.**

Listen — we're not only talking about your prostate health here.

We're dealing with your sex life...your overall well-being... and, quite simply, your manhood.

That's why it's so important that you're proactive when it comes to your prostate health. As no less an authority than the Mayo Clinic has warned — your embarrassing symptoms could lead to serious health complications if left untreated.

So take the first step — today — by making an intelligent, proactive decision to help improve your chances of sustained prostate health.

Our **Prostate Defender** formulation contains the power of **Beta-Sitosterol** — the breakthrough discovery that's more than 3,000 times stronger than past natural solutions.

Within just a few days of taking **Prostate Defender**, you could begin to feel rejuvenated as you start getting complete, restful nights of sleep — no more nights filled with a race to the bathroom every hour!

You may also feel more confident as you no longer have to worry about “performance anxiety” or a weak, dribbling stream when visiting a crowded restroom.

But because your prostate is actually a sex organ, you may begin to experience some very satisfying “extra” benefits as well — including increased stamina...a surge in sexual desire...

and an improvement in overall sexual performance!

Like I said — when you're talking about prostate health... you're really talking about your manhood.

And I know you don't want to take any chances with that — especially when the potential consequences could involve painful, terrifying surgery...or a lifetime of spending thousands per year on costly prescription drugs.

One more thing — when it comes to those prescription drugs, it's important to remember that the money being sucked out of your wallet is only a small part of the cost. Here's what I mean...

## CHAPTER FIVE

### The “Hidden” Cost of The Great Prostate Health Fraud!

#### Why are These Dangerous Side Effects Being Swept Under the Rug?

I’ve already told you about the staggering costs associated with the prescription drugs — many of which I’m sure you’ve seen on television — that deal with an enlarged prostate.

But that cost — as high as \$3,000 per year in the case of Flomax — is actually just the beginning.

You see...these prescription drugs come with a “hidden cost” in the form of dangerous side effects.

And there’s no way you can catch them all in the fine print of a magazine ad...or as they’re being glossed over in a slick television commercial.

But here’s just a partial list of the side effects associated with three of today’s most popular prescription BPH drugs:

- Inability to have an erection
- Decreased sex drive
- Breast enlargement and/or swelling
- Abnormal ejaculation and/or fertility issues
- Diarrhea
- Dizziness, headaches and fatigue
- Back pain
- Sore throat
- Upper respiratory tract infection

Like I said...that list was compiled from the advertisements for those drugs — the manufacturers are legally obligated to tell you about every one of them.

But there are still more that wind up in print much larger than what you see in those colorful ads — in some cases, they make headlines:

***“Study Reiterates Eye Risks  
Linked to Flomax”***

***~ U.S. News & World Report***

***“Drug for enlarged prostate can cause complications after cataract surgery”***

*~ CBC News, Canada*

According to published reports, men who take Flomax face more than double the risk for serious complications should they need cataract surgery.

But there's more.

According to the New York Times, even if you're prescribed one of these “miracle drugs” for your enlarged prostate...

There's nearly a one-in-three chance that you'll stop using it within 12 months!

Why?

Because of the adverse side effects...or because it simply isn't working!

***“30 percent of patients discontinue alpha-blocker medication for their B.P.H. within the first 12 months***

***due to adverse side effects or nonresponse.”***

*~ New York Times*

***“Flomax is just the latest in a series of drugs promoted as blockbusters that, in fact, create more sticker shock than anything else.”***

*~ Consumer Reports*

Don't be fooled by the drug companies' hype — and don't fall victim to **The Great Prostate Health Fraud.**

Instead of taking drugs that come with staggering costs...

dangerous side effects...and may not even work...

Why not instead turn to an all-natural solution designed to take advantage of the greatest male health discovery of our generation: **Prostate Defender!**

# The Most Significant Male Health Discovery of Our Generation?

One all-natural formulation — revealed inside —  
is guaranteed to help you...

- Eliminate those frustrating late-night races to the bathroom...
- Stop dribbling...and start peeing with the same force you had 20 years ago...
- Regain your energy — and the sex drive you used to have
- And best of all...you'll avoid painful — and potentially dangerous — surgery.

## PLUS:

How *The Great Prostate Health Fraud* could cost you as much as \$3,000 per year...but that's only a small part of the real problem!

**Learn how you can  
avoid becoming  
a victim INSIDE!**
